44443/44643 Mobile Computing - iOS

Assignment 5 Points 20

Please follow the following instructions to complete this assignment.

1. Open Xcode from the launchpad of your mac.
2. Click on create a new Xcode project. Select the iOS template and click on the App application.
3. Click on next which will prompt you to choose options for the project.
4. Provide product name as **Lastname_WordGuess**, "nwmsu" for organization identifier, "storyboard" as interface and swift as language.
5. Click on next and select an appropriate location to save your app and click on create. A project directory will be loaded.
6. When you are done with selecting the location of the project on your local storage, moving further you can see project settings screen. Set your **Project Format** to "Xcode 13.0-compatible" in your Project Document settings.
7. Now look into **Deployment Info** settings on the same project settings and set it to "ios 15.5" and make sure to check iPhone and iPad. Check below image and highlighted portion with red and follow accordingly.
